

Technische Fiche: SR5FPA0006

Intake Pipe for Fire Detection/Extinguishing System

Extension set

SCHRACK-Info

- The suction pipe set is used for extended smoke detection for hermetically separated enclosures in which there is neither a Primary nor a Secondary fire extinguishing system (FES) or a early fire detection system (EFD).
- One set is required for each additional enclosure.

Technische gegevens

Netto lengte (mm)	3.000,00
